

# Final project proposal

Math 123

Due April 7, 2023 by midnight

*Instructions.* Choose a final project <sup>1</sup> and a final project partner (groups of 2 – anything different needs approval). I would like you to submit the following information:

- (i) Project title
- (ii) One paragraph about the focus and scope of your project. (Don't be overly ambitious. The presentation is 10 minutes! You should pick a single question/problem/theorem to focus on.)
- (iii) A list of at least two references you will use (not Wikipedia)

Submit this as a group on Gradescope. One submission per group!
